

Adult Living Showers

KEEPING THE ELDERLY SAFE.

Preventing falls is key to keeping the elderly safe and alive. In fact, falls are the leading cause of death due to an injury for older adults. While this is especially true for women, it's important to keep all aging loved ones safe.

At Longevity Acrylics, we understand the importance of keeping the elderly safe from falls, which is why we've created our adult living units. These showers are built specifically with older individuals in mind. Here are a few things you're investing in by choosing one of these models.

Grab Bars

Whether it's getting into or out of the shower, grab bars are there for extra support when needed.

Seats

Being able to have a seat while bathing takes away some of the danger of falling in the shower.

Drip Lip

When water's on the floor, the elderly are especially susceptible to falls. Each adult living unit has a rail to catch the water before it gets all over the bathroom.

As with all of our showers, adult living units are manufactured with thick, durable, 100 percent acrylic. That means they're long-lasting, easy to clean, colorfast and leak proof. Find out more about our adult living units, and help the elderly loved ones in your life stay safe.
